\$3.00	10th Yr. or Older	\$52,421	\$81,532	\$14,217	\$30,060	\$174,269

100% of the actual purchase price shall be used to establish the taxable value for a newly purchased *vehicle greater than sixteen thousand pounds declared empty vehicle weight*. This applies to all vehicles when initially purchased at the retail level by a person who intends to put the vehicle into initial use, effective for purchases on or after July 1, 2002 (effective date of statute). The taxable value shall not change for the life of the vehicle.

Use 75% of the Manufacturers Suggested Retail Price (MSRP) to calculate the taxable value on *vehicles less than 16000 declared empty vehicle weight*.

When the MSRP is not available, use the Colorado Ownership Tax List Price Average as supplied by Colorado Motor Carrier Servicesto find the taxable value. Locate the taxable value by comparing the model year and the number of axles for the appropriate vehicle type. Use the taxable value as indicated to complete the formula below to calculate the Ownership tax due:

Taxable Value ____ X Model Year O/T% ____ = ____ / 12 months = ____ X ____ # of Months X Colo. % = Ownership Tax Due ____.
